

# MINH LE

FRONTEND ENGINEER

## CONTACT

- (+84) 9898 74 007
- libraminh@gmail.com
- <https://minhle.vercel.app/>
- Ho Chi Minh city, Vietnam

## CORE SKILLS

### Frontend & Frameworks

React, Next.js, TypeScript, JavaScript, Vue.js

### State & Data Management

Zustand, React Query, Redux Toolkit, React Context

### UI & Styling

Tailwind CSS, Shadcn/UI, MUI, Ant Design, Vuetify

### Forms & Validation

React Hook Form, Yup, Zod

### Tooling & Quality

Vite, Webpack, Turbopack, Jest, SonarQube, Git

### CMS & Platforms

WordPress, ACF, Elementor, HubSpot

### Backend (Supporting)

Node.js, NestJS, MongoDB, Firebase

## PROFILE

Seasoned Frontend Developer with 8+ years of experience building scalable web applications and high-performance marketing platforms. Strong expertise in React, Next.js, TypeScript, and modern state management. Proven track record delivering complex UI systems, data visualization tools, and enterprise-grade web products for international clients.

## WORK EXPERIENCE

### Frontend Engineer | ASWHITE GLOBAL

Oct, 2023 - Present (Hybrid)

#### Main responsibility

- Served as the primary frontend developer for the **Flexigrow** Finance application, owning frontend architecture and implementation across React and Next.js.
- Designed and standardized component architecture, folder structure, and naming conventions, significantly reducing duplication and improving maintainability.
- Introduced a unified form system by wrapping React Hook Form + Shadcn/UI, enabling consistent validation and reusable form components across the application.
- Led the migration from MUI to Shadcn/UI with Tailwind CSS, improving performance, bundle size, and design consistency.
- Implemented state management and data fetching strategies using Zustand and React Query.
- Integrated Stripe payment processing into a multi-step Next.js form flow, handling secure checkout, validation, and payment state management.
- Built complex UI features including:
  - Role-based dashboards with data visualization (Recharts)
  - Multi-step registration flows
  - Calendar-based scheduling with drag-and-drop interactions
- Applied role-based access control (RBAC) using CASL to support multiple user permission levels.
- Upgraded the application from Next.js 14 to 16, migrating the build system from Webpack to Turbopack.
- Set up code quality and testing infrastructure, integrating SonarQube scanning with Jest unit tests.
- Collaborated closely with designers, backend developers, and product managers to scope features, estimate tasks, and deliver client requirements.
- Reviewed frontend code and provided technical guidance to other frontend contributors.

#### WordPress & CMS Work

- Developed custom WordPress themes using ACF and Elementor, including custom widgets to allow non-technical editors to manage content and styling.
- Optimized WordPress sites for SEO and performance, achieving Lighthouse scores of 100 across performance, accessibility, and best practices.
- Handled deployment and hosting setup, ensuring fast load times and stable production environments.

**Tech Stack:** React, Next.js, TypeScript, Zustand, React Query, React Hook Form, Yup, Shadcn/UI, Tailwind CSS, CASL, Jest, SonarQube, WordPress, ACF, Elementor, Vercel

# MINH LE

## FRONTEND ENGINEER

---

### Frontend Developer | **GIGARION TECHNOLOGY**

May, 2022 - July, 2023 (Onsite)

- Involve to build Analysis Designer web application which is a tool for data illustration.

### PORTFOLIO

#### Flexigrow Finance App

**Stacks:** Next.js, React, Zustand, React Query, Shadcn/UI, Tailwind CSS

**Responsible:**

- Frontend Architecture & UI System
  - Defined component structure, folder conventions, and naming standards to ensure consistency and long-term maintainability.
  - Built a reusable form system by wrapping React Hook Form with Shadcn/UI, reducing duplicated logic across the application.
- Complex User Interfaces
  - Implemented role-based dashboards with data visualization using Recharts.
  - Built calendar-based scheduling with drag-and-drop interactions to manage staff tasks and events.
  - Developed multi-step registration and onboarding flows with robust validation.
- Payments & Business Logic
  - Integrated Stripe payment processing into a multi-step Next.js flow, handling secure checkout, validation, and payment state management within the frontend.
- State, Access & Security
  - Applied state management using Zustand and React Query for predictable data flow and server state handling.
  - Implemented role-based access control (RBAC) using CASL to support multiple permission levels.
- Performance & Tooling
  - Migrated the application from Next.js 14 to Next.js 16, transitioning the build system from Webpack to Turbopack.
  - Improved performance and design flexibility by migrating from MUI to Shadcn/UI with Tailwind CSS.
  - Set up code quality and testing pipelines, integrating SonarQube scanning with Jest unit tests.
